Cape Town

TOURISM

Successful tourism doesn't just boost economies – it builds pride too!

Cape Town Tourism is the City of Cape Town's official regional tourism organisation, responsible for destination marketing, visitor and industry services.

Cape Town Tourism prides itself in a culture of service excellence and we are committed to responsible and fair tourism and business practices. We therefore work with and encourage the involvement of previously disadvantaged individuals, organisations and companies in tourism in a number of ways. We also support the principles of Responsible Tourism and Fair Trade in Tourism South Africa, we are Proudly South African, we are passionate about Cape Town and we encourage our members to adopt these principles in the operations of their businesses as well.

www.capetown.travel

WELCOME NOTE

Welcome to this edition of **Government Today**, a publication dedicated to highlighting the work, progress and priorities shaping South Africa's public sector. This issue brings together key updates from national government, provinces, municipalities, state-owned entities, agencies and development partners, with a strong focus on how public-sector activity connects to business growth, community development and everyday service delivery.

Government is often viewed through policy announcements, budgets and official statements. Yet behind every plan is a practical story: a road being built, a water project being repaired, a small business being supported, a young person being trained, a municipality improving its systems or a community gaining access to better services. These are the stories that matter because they show how governance affects people, places and opportunity.

In this edition, we aim to present government information in a clear, accessible and useful way. Our goal is to help readers understand not only what is happening across the public sector, but why it matters. Whether you are a business owner, supplier, investor, public servant, community leader or citizen, this publication is designed to keep you informed and connected to the developments shaping South Africa.

As the country continues to focus on infrastructure, economic growth, service delivery and social impact, **Government Today** provides a platform for insight, visibility and constructive public-sector storytelling.

Northern Cape
GAMBLING BOARD

Northern Cape Gambling Board

Monument Heights, Monument Heights,
Kimberley, Northern Cape, South Africa
Tel: +27 81 761 9101 | www.ncgb.co.za

VISION

To be a leading and well respected Gambling Regulatory Authority in South Africa.

MISSION

To Control and Regulate gambling and all related activities incidental thereto in order to:

- Ensure that Gambling activities in the Northern Cape Province are conducted with integrity and,
- Contribute in a Socially Responsible manner to the long term economic benefits for the people of the Northern Cape

VALUES

Respect, Integrity, Professionalism, Teamwork, Transparency, Independence, Ethical Conduct, Trust, Honesty, Diligence, Confidentiality.

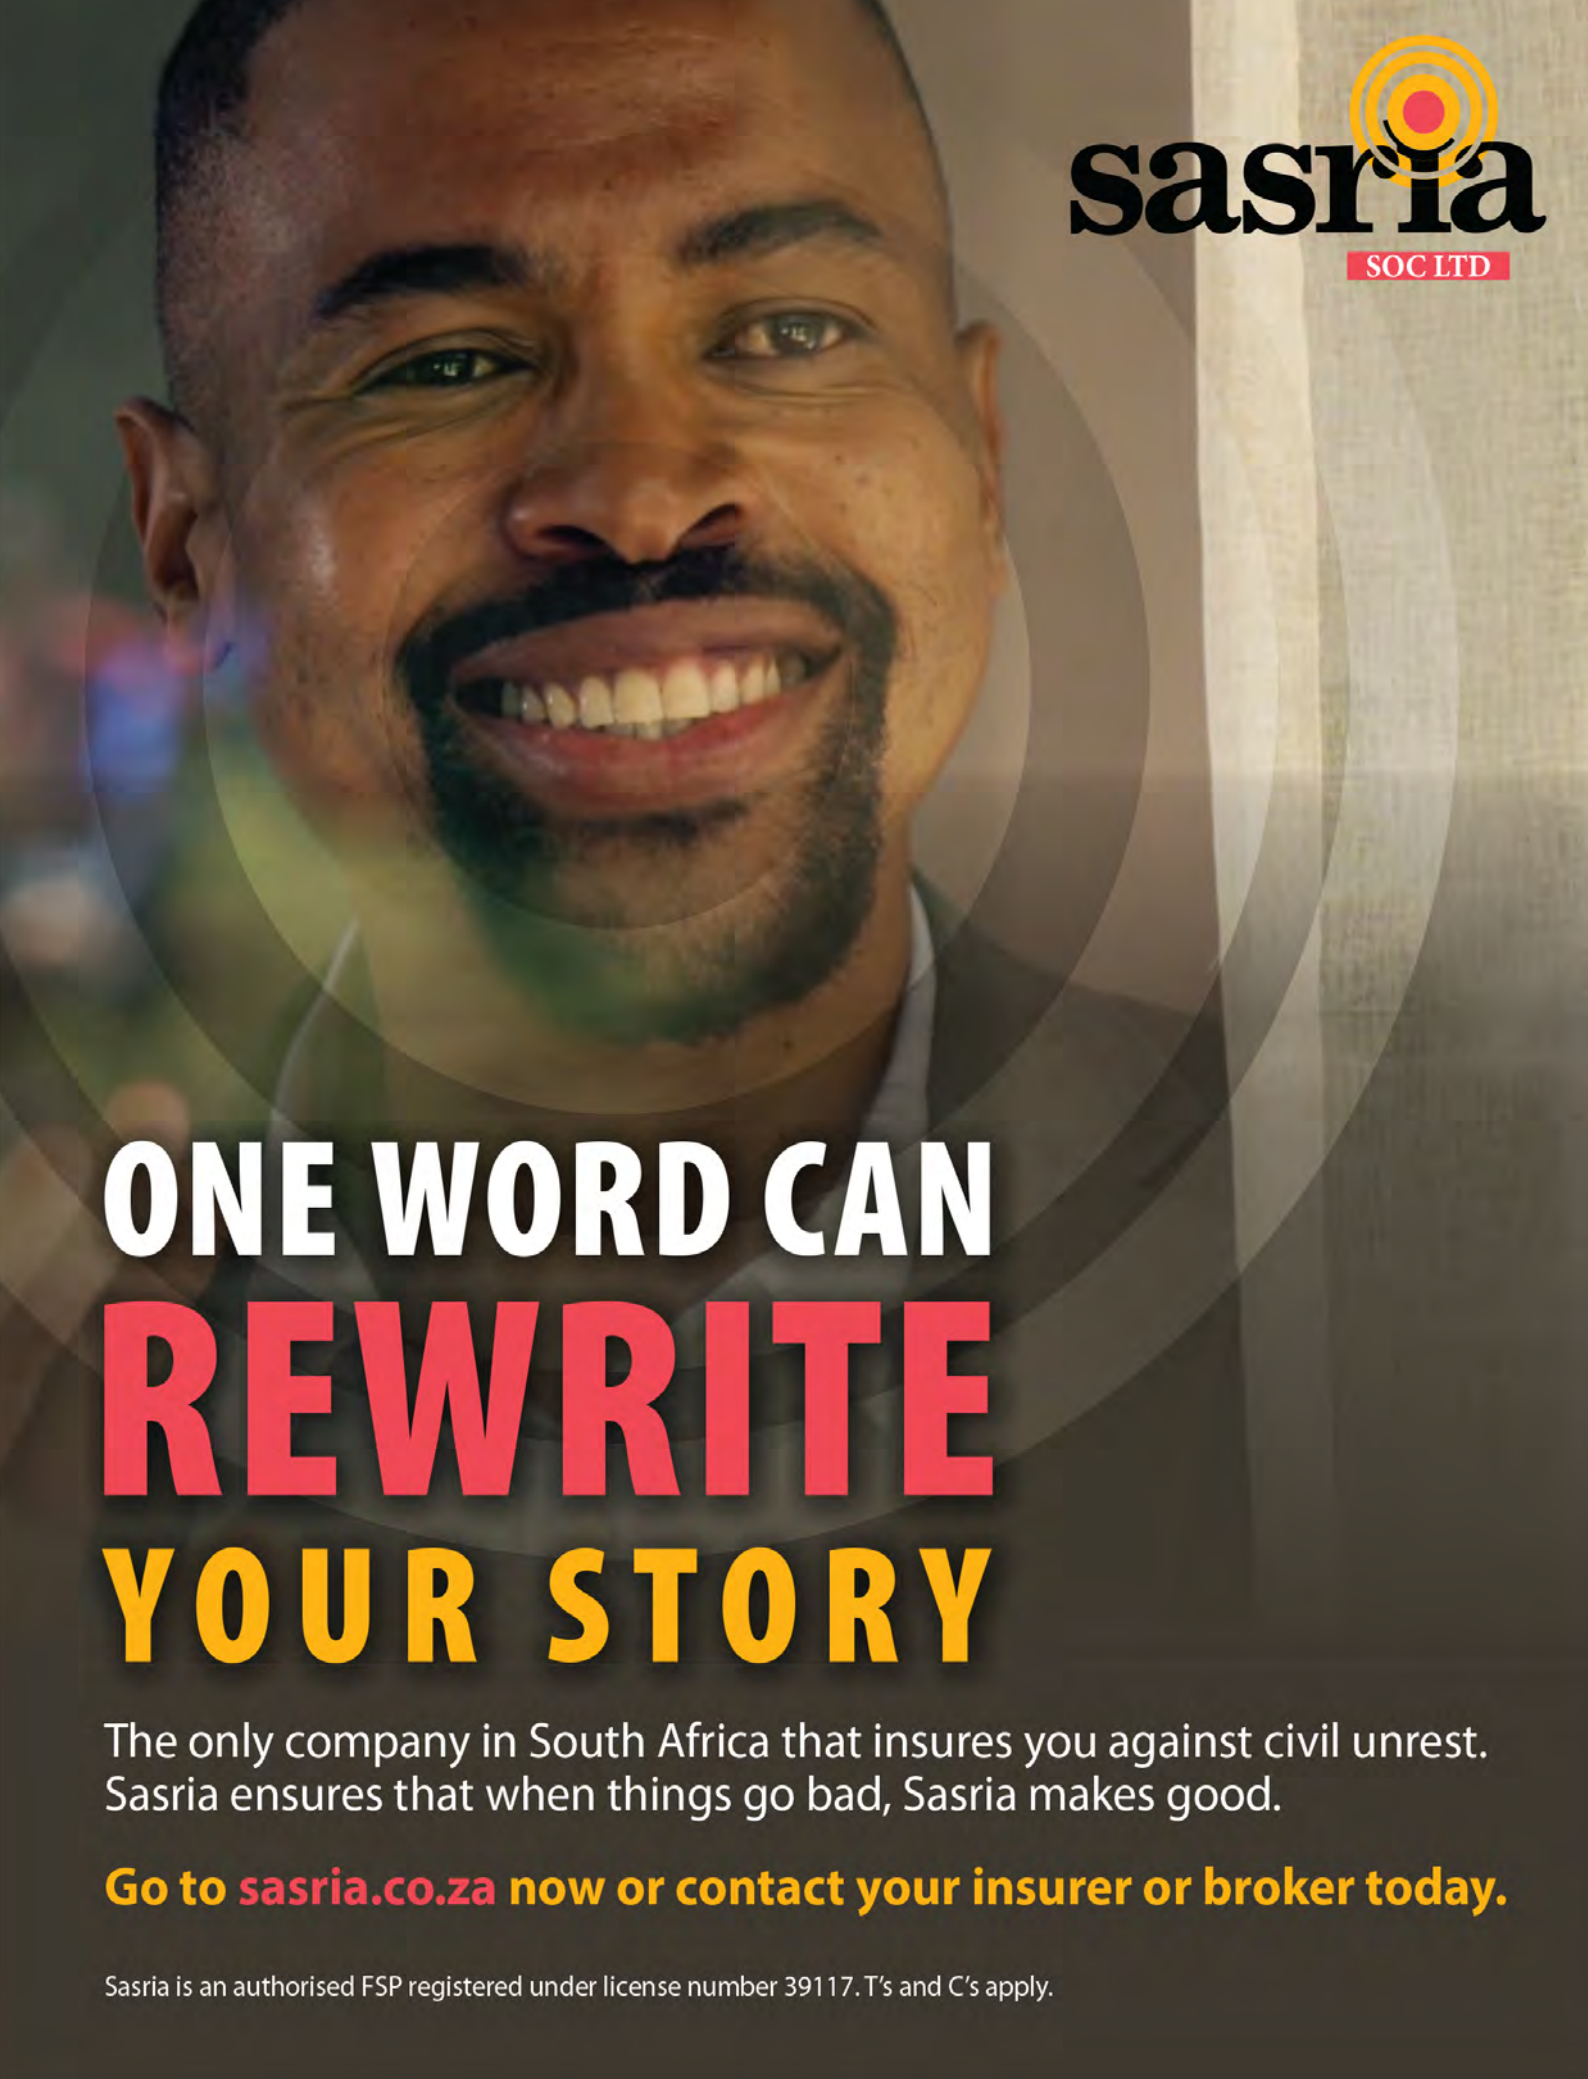

PURPOSE OF THE PUBLICATION

The purpose of **Government Today** is to bridge the gap between government information and public understanding. Across South Africa, departments, provinces, municipalities, state-owned entities and agencies are driving programmes that affect business, communities and citizens. However, this information is often spread across many platforms, reports, speeches and announcements. This publication brings those developments together in one clear and professional format.

Government Today is designed to inform, explain and showcase. It highlights key government priorities, development projects, investment opportunities, service delivery improvements, public-private partnerships and community impact stories. It also creates space for businesses and suppliers to understand where opportunities may exist within infrastructure, procurement, tourism, technology, trade, investment and local economic development.

For the public, the publication explains government work in simple language. It helps readers understand how policies, budgets and projects translate into real-world outcomes. For business, it provides insight into sectors linked to government planning and public-sector delivery. For government stakeholders, it offers a platform to communicate progress, recognise successful initiatives and build greater public confidence.

At its heart, this publication is about connection. It connects policy to practice, departments to communities, suppliers to opportunities and citizens to the public-sector developments that shape daily life. By presenting government news and development information in a magazine-style format, Government Today supports transparency, awareness and informed participation.

KEY ANNOUNCEMENTS FROM MINISTRIES

National government is advancing energy security, infrastructure rollout, job creation and stronger institutions to drive inclusive growth and improve lives.

South Africa's national government continues to play a central role in shaping the country's economic recovery, service delivery improvements and long-term development. Recent announcements from ministries highlight a renewed focus on energy security, infrastructure rollout, job creation and strengthening public institutions.

These announcements show where government is placing its attention and resources. They also help businesses, communities and public-sector partners understand which areas are likely to receive policy support, investment and implementation focus.

Key Areas of Focus

Recent ministry announcements have placed emphasis on:

- Energy security and efforts to stabilise electricity supply
- Infrastructure rollout linked to roads, housing, water and public facilities
- Job creation through public investment and development programmes
- Stronger public institutions that can deliver services more effectively
- Economic recovery through reforms that support business confidence
- Improved service delivery across national, provincial and municipal systems

Key updates from the Presidency have also emphasised progress under Operation Vulindlela, which is aimed at accelerating structural reforms in important sectors of the economy.

“ The focus remains on implementation, turning commitments into outcomes that improve the lives of citizens. ”

Operation Vulindlela Priorities

The reform agenda continues to focus on:

- Electricity and energy market reform
- Logistics and freight improvement
- Telecommunications and digital infrastructure
- Water-sector reform
- Reducing bottlenecks that slow down investment
- Improving coordination between departments and public entities

Efforts to stabilise Eskom and expand renewable energy capacity remain a top priority. At the same time, initiatives to improve Transnet's freight and port operations are being positioned as important steps toward supporting trade, exports and economic growth.

What This Means for Business

For businesses, these announcements signal areas of opportunity, especially in sectors linked to public-sector delivery.

Possible opportunity areas include:

- Infrastructure development
- Energy and renewable energy projects
- ICT and digital systems
- Transport and logistics
- Construction and engineering
- Water and sanitation services
- Professional consulting and project management
- Supplier and contractor participation

What This Means for Citizens

For communities, the impact of ministry announcements is most visible when policy becomes delivery.

Citizens are likely to benefit through:

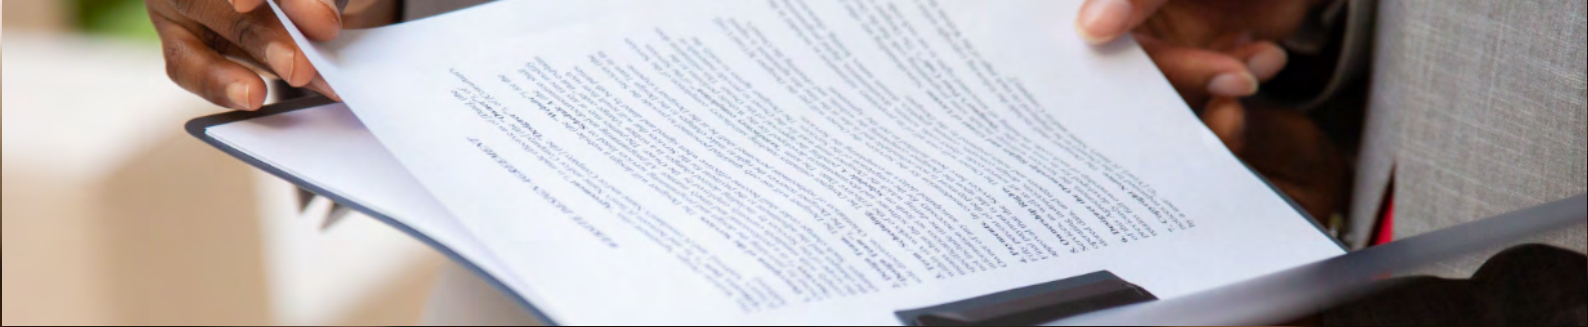

- More reliable public services
- Better roads and transport systems
- Improved access to housing and basic infrastructure
- Stronger electricity and water systems
- More employment and skills opportunities
- Better coordination between government departments

POLICY UPDATES & LEGISLATION

Staying informed on policy developments and legislation is essential for building a stronger, more transparent and competitive South Africa.

“ Effective legislation and clear
implementation are the foundation of good
governance and sustainable progress ”

Recent policy developments and legislative updates reflect government's commitment to reform and modernisation. Parliament continues to process key bills aimed at strengthening governance, improving economic competitiveness and enhancing social protection.

Among the notable areas of focus are energy reform policies that support private sector participation in electricity generation, amendments to procurement legislation to improve transparency and efficiency, and regulatory updates in sectors such as telecommunications and transport. These changes are designed to remove bottlenecks, attract investment and improve service delivery.

SUCCESS STORY

Recent reform efforts in energy, logistics and procurement are helping create a more transparent, investment-friendly environment while improving the foundations for service delivery and economic growth.

POLICY TO PRACTICE

From policy to practice: Reform only delivers value when legislation is clearly communicated, efficiently implemented and translated into stronger public services, better governance and improved investor confidence.

Government has also prioritised policies that support small businesses and entrepreneurship, recognising their role in job creation. Initiatives aimed at reducing red tape and improving access to funding are being implemented across departments.

For citizens, legislative updates often translate into improved rights and protections, whether in labour relations, consumer protection or access to services. For businesses, staying informed about these changes is essential for compliance and strategic planning.

The challenge remains ensuring that policies are effectively implemented and communicated. Clear guidance from departments and ongoing engagement with stakeholders are critical to ensuring that legislation achieves its intended impact.

Executive Mayor
Cllr. John Mpe

Municipal Manager
Mr. Dikgape Makobe

Polokwane Municipality will strive:

- To provide a reliable, consistent and dependable service
- To respond and be willing to provide efficient service to all clients
- To attain necessary skills and knowledge to render efficient services
- To ensure easy access to the Municipality and the various facilities
- To ensure an effective two-way communication between our clients and ourselves
- To be credible, reliable, honest and trustworthy
- To ensure confidentiality when dealing with customers to care for and maintain municipal assets to be presentable at all times
- To establish one stop customer care centres
- To establish a 24hr customer care facility

Providing
sustainable
quality services
for a better
life for
all.

MISSION

To build prosperity, eradicate poverty and inequality, and promote the social, political and economic empowerment of all our people through delivery of quality services, community participation and smart administration. We shall strive, in all our activities and programs to be responsive, efficient, effective, transparent, informative, competitive, accountable, representative, consultative, loyal, honest and empowering **CUSTOMER CARE.**

“

These projects show how provincial development is becoming more practical, targeted and measurable. From Gauteng's water systems to the Western Cape's resilience planning and the North West's road and housing priorities, provinces are increasingly being judged by visible delivery on the ground.

”

MAJOR PROJECTS UNDERWAY

Across South Africa's nine provinces, major public-sector projects are moving from planning tables into communities, industrial zones, roads, water networks and digital systems. These projects reflect a national push to use infrastructure as a driver of economic growth, service delivery and job creation. In the 2026 national budget, government confirmed that public-sector infrastructure spending will exceed R1 trillion over the medium term, with provinces and municipalities playing a central role in delivery.

These projects show how provincial development is becoming more practical, targeted and measurable. From Gauteng's water systems to the Western Cape's resilience planning and the North West's road and housing priorities, provinces are increasingly being judged by visible delivery on the ground.

AT A GLANCE

Public-sector infrastructure
spending: Over R1 trillion

Key provincial themes:
Water, housing, roads, resilience

Development focus:
Growth, service delivery,
job creation

Provincial Focus Areas

- Gauteng:** Water security has become one of the province's most urgent infrastructure priorities. A R760 million infrastructure upgrade is underway in Johannesburg to address water interruptions, with work including new reservoirs, pumping infrastructure and pipeline improvements. These projects are designed not only to stabilise supply but also to support future growth in one of the country's busiest economic regions.

- Western Cape:** The province is placing water resilience at the centre of its agenda. More than R250 million has been invested to unlock further municipal water infrastructure investment, while projects such as desalination, pipeline upgrades, reservoir construction and the raising of the Clanwilliam Dam wall are expected to strengthen long-term water security.

- North West:** Government has announced a major infrastructure drive focused on water, housing and roads. The programme is aimed at restoring dignity in communities while stimulating local economic activity through contractors, subcontractors and small businesses.

For businesses, these provincial investment opportunities point to strong potential in construction, engineering, renewable energy, ICT, logistics, water services, agro-processing, tourism and professional services. The opportunity is not only to invest in provinces, but to partner with them in building the next generation of infrastructure and economic activity.

INVESTMENT OPPORTUNITIES

South Africa's provinces are competing more actively for investment, and each region offers a different economic advantage. For investors, the provincial landscape is no longer only about location; it is about infrastructure readiness, skills availability, logistics access, energy security and government support.

For businesses, these provincial investment opportunities point to strong potential in construction, engineering, renewable energy, ICT, logistics, water services, agro-processing, tourism and professional services. The opportunity is not only to invest in provinces, but to partner with them in building the next generation of infrastructure and economic activity.

KEY PROVINCIAL ADVANTAGES

- **Gauteng:**
Finance, manufacturing, digital services, urban infrastructure
- **Northern Cape:**
Green hydrogen, renewable energy, critical minerals
- **KwaZulu-Natal:**
Logistics, energy, export-led growth, industrialisation
- **Free State:**
renewable energy, battery storage, development corridors

AT A GLANCE

Provinces are strengthening their investment value proposition through infrastructure, energy and skills.

Strategic sectors driving growth include renewable energy, manufacturing, logistics, digital services and tourism.

Government and business are aligning to create enabling environments for long-term, inclusive investment.

1

- **Gauteng:** Gauteng remains South Africa's main economic engine and continues to attract major capital flows. In 2026, the reported R27 billion in foreign direct investment, while investment commitments from the Gauteng Investment Conference were moving into implementation across multiple sectors. This positions Gauteng as a strong destination for finance, construction, manufacturing, digital services and urban infrastructure development.

2

- **Northern Cape:** The province is placing water resilience at the centre of its agenda. More than R250 million has been invested to unlock further municipal water infrastructure investment, while projects such as desalination, pipeline upgrades, reservoir construction and the raising of the Clanwilliam Dam wall are expected to strengthen long-term water security.

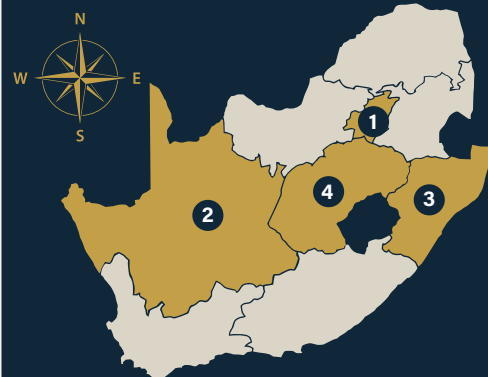

3

- **KwaZulu-Natal:** KwaZulu-Natal's investment outlook is strongly linked to energy, logistics and industrialisation. Richards Bay is positioned as a strategic energy and export-led growth hub, while the province has set a target of generating 5,000 megawatts of renewable energy by 2030. Energy reliability is increasingly viewed as essential to unlocking future investment in the province.

4

- **Free State:** In the Free State, renewable energy and strategic development corridors are helping reshape the investment narrative. The province has reported renewable energy projects worth more than R100 billion under tracking, including solar and battery storage developments.

Finance

North West Provincial Government
Republic of South Africa

Bokone Bophirima Department of Finance was gazetted in July 2014 following the general elections that took place in May to report to the MEC for Finance, Economy and Enterprise Development. The MEC is however responsible for two Departments, namely Department of Finance and Department of Economy and Enterprise Development. Each department is still responsible for its mandate as required by the legislation. The Department of Finance executes the functions of a Provincial Treasury and is responsible to ensure that financial resources allocated to Bokone Bophirima Province are employed effectively and efficiently to the benefit of the people of the province. There is indeed, a scope for us to facilitate the improvement of financial management both at provincial and local government levels. Improved financial management includes quality spending of our scarce resources by government departments. We plan to strengthen the resource control unit in the Provincial Treasury to ensure that we monitor spending throughout government departments and municipalities.

HOD-Mr Ndlela Kunene

www.treasury.nwpg.gov.za

SMART CITY AND DIGITAL TRANSFORMATION PROJECTS

Smart technology. Strong services.
Better lives for all communities.

Digital transformation is no longer only a future concept for municipalities. It is becoming a practical part of service delivery, accountability and planning. Smart city thinking is now being used to improve how municipalities track performance, communicate with residents, manage infrastructure and respond to service delivery problems.

A strong current example is the Gauteng Smart City Performance Monitor, a real-time dashboard launched to track key performance indicators across all 11 municipalities in Gauteng. The dashboard monitors areas such as governance, financial management, infrastructure delivery, climate resilience and disaster preparedness, while also giving residents access to municipal performance data.

This type of tool shows how digital systems can strengthen accountability. Instead of waiting for long reports after the fact, municipalities can use data to identify problems earlier, compare performance and give communities clearer visibility on progress.

Digital transformation is also changing citizen access to services. Municipal e-services, online billing, digital fault reporting, development application systems and customer portals can reduce queues, improve convenience and create better records of municipal

requests. The City of Cape Town's online services include access to municipal account services, jobs, licence renewals, development applications and fault reporting tools.

However, smart city development must not only benefit well-connected urban residents. Rural municipalities and smaller towns also need digital inclusion, better connectivity and simpler service platforms. The real test of digital transformation is whether it improves the experience of ordinary residents, especially those who have historically struggled to access services.

For municipalities, the smart city agenda should be practical: use technology to improve response times, track infrastructure, reduce corruption, modernise revenue collection and communicate better with the public. A smart municipality is not only one with technology. It is one that uses technology to serve people better.

Putting people first: Better services, closer to home.

Growing local economies, creating opportunities.

COMMUNITY UPLIFTMENT PROGRAMMES

Building stronger communities through opportunity, skills and local support.

BUILDING STRONGER COMMUNITIES

Community upliftment remains one of the most important roles of local government. Municipalities are closest to communities and are often best positioned to identify local needs, support vulnerable households and connect residents to development opportunities.

The Community Work Programme continues to play an important role in this space. Government says the

programme is designed to provide predictable local work opportunities in areas with high unemployment, while serving as both an income safety net and a pathway to work experience. Over the medium term, the Department of Cooperative Governance aims to maintain around 200,000 participants annually through a R9.8 billion allocation.

CoGTA has also indicated that the Community Work Programme is being repositioned toward skills development, enterprise creation and sustainable livelihoods. Participants are already contributing to waste management, minor infrastructure repairs and local service delivery initiatives.

INVESTING IN PEOPLE

Youth development is another major area of municipal relevance. Government has highlighted the need to build a pipeline of young artisans, engineers, town planners and technical professionals who can support local government infrastructure delivery.

Environmental capacity is also becoming important at municipal level. The Municipal Environmental Graduates Programme, launched in 2025, initially placed 430 environmental graduates in municipalities for a 24-month period to respond to youth unemployment and strengthen environmental capacity in local government.

Community upliftment programmes should not be seen as charity. They are investments in local resilience. When residents gain skills, income, experience and access to opportunities, communities become stronger. When municipalities work with civil society, businesses and provincial departments, upliftment programmes can become pathways to employment, entrepreneurship and long-term social stability.

KEY FOCUS AREAS

- Community Work Programme
- Skills development
- Enterprise creation
- Youth technical pipeline
- Environmental graduates
- Sustainable livelihoods

WHY IT MATTERS

- Strong communities are built on jobs, skills and opportunity.
- Investing in people today creates lasting local resilience and long-term.

UPDATES FROM ESKOM, TRANSNET, SANRAL AND OTHER AGENCIES

South Africa's state-owned enterprises and public agencies remain central to the country's economic recovery, infrastructure delivery and long-term development. In 2026, the focus has shifted from crisis management toward reform, operational stability, private-sector collaboration and improved delivery across energy, logistics, roads, ports, rail and aviation.

Eskom has entered a new phase of recovery after recording more than 400 days without load shedding. The utility has reported improved generation availability, reduced unplanned outages and lower diesel spending, supported by its Generation Recovery Plan. According to recent updates, Eskom's Energy Availability Factor improved to 63.81%, compared with 58.31% over the same period last year, while average unplanned outages between 19 and 25 June 2026 were significantly lower than the same week in 2025.

At the same time, the electricity sector is undergoing structural reform through the National Transmission Company South Africa. Eskom, NTCSA, RTE International and the Agence Française de Développement signed a cooperation agreement in June 2026 to strengthen South Africa's power grid, with the work focused on renewable energy integration, system stability, artificial intelligence, analytics, high-voltage transmission and modern grid skills.

DELIVERY AT A GLANCE

400+
days
without
load shedding

11
train operating
companies
on Transnet's rail
network

R31
billion
allocated to SANRAL
in 2026

“

From power generation and freight rail to national roads and logistics corridors, South Africa's state-owned enterprises and public agencies remain central to economic recovery and long-term development.

”

Transnet's reform story is equally important. In May 2026, the Transnet Rail Infrastructure Manager announced 11 train operating companies that were allocated slots on Transnet's rail network. This is a major milestone in opening the national rail system to private operators, increasing active operators from one to 12 across five strategic corridors and introducing additional freight capacity to support mining, agriculture, automotive, fuel, container and general freight movement.

upgrades, with projects expected to support road safety, shorten travel distances, create more than 35,000 job opportunities and support over 2,000 small enterprises.

Together, these developments show how SOEs and agencies are being repositioned as delivery platforms. Their success matters not only to government, but to every household, commuter, exporter, manufacturer, contractor and small business that depends on reliable infrastructure.

WHY IT MATTERS

- ✓ More reliable power for households and businesses
- ✓ Stronger logistics and rail capacity to boost exports and trade
- ✓ Better roads that improve mobility, safety and reduce costs
- ✓ More jobs, opportunities and support for small enterprises
- ✓ Greater investor and business confidence in South Africa

SANRAL continues to play a central role in road infrastructure. Government has allocated almost R31 billion to SANRAL in 2026 to maintain, rehabilitate, upgrade and expand the road network. The allocation includes work on the non-toll road network, the N2 Wild Coast route, the Moloto Road corridor and national highway

INFRASTRUCTURE AND LOGISTICS DEVELOPMENTS

Infrastructure is not just about movement. It is about movement and confidence.

From freight rail and port capacity to roads energy and strategic logistics corridors, South Africa's infrastructure system is being reshaped to support growth, trade and long-term competitiveness. The latest developments show how public investment and reform are helping build a stronger foundation for national delivery.

Infrastructure and logistics are among the most important drivers of South Africa's competitiveness. When electricity is stable, ports are efficient, roads are maintained and rail corridors operate reliably, businesses can move goods faster, communities can access services more easily and the economy becomes more attractive to investors.

In the transport sector, the government has placed strong emphasis on unlocking freight and export capacity. Recent reforms in rail and ports are designed to move more freight from road to rail, reduce congestion, improve port handling performance and support industries that rely on export routes. The opening of the rail network to private train operating companies is intended to add freight capacity and help South African producers move minerals, vehicles, agricultural products and other goods to local and international markets.

The Durban Container Terminal Pier 2 concession has reached financial close and is expected to increase handling capacity from 2 million to 2.8 million TEUs per year. Government has described this as a bankable model for future public-private partnerships, with further private-sector participation projects expected in the Ngqura Manganese Export Corridor, Richards Bay

movement, reliability, trade, safety

”

WHY IT MATTERS

Stronger trade efficiency

Higher port and rail capacity improves export performance and global competitiveness.

Greater investor confidence

Reforms and partnerships create a stable environment for sustainable investment.

Stronger logistics network

Better rail, ports and corridors reduce congestion and lower the cost of doing business.

Better mobility and safety

Upgraded roads improve travel times, road safety and community access.

Economic growth

Reliable infrastructure unlocks jobs, supports industry and drives inclusive economic growth.

Dry Bulk Terminal and the Gauteng-to-eThekweni Container Corridor. In the Eastern Cape, Transnet has also signed a terminal operator agreement for a R22 billion gas facility project in the Coega Special Economic Zone. The project includes floating and permanent onshore infrastructure to supply gas to industry, data centres and independent power producers, with the potential to support around 3,500 MW of electricity

generation. It is expected to create more than 500 jobs during construction and 50 permanent jobs once complete. Road infrastructure remains a national priority through SANRAL's ongoing project pipeline. The nearly R31 billion allocation to SANRAL supports upgrades, rehabilitation and new road sections, while also highlighting the growing pressure on national, provincial and municipal road maintenance systems.

These developments show that infrastructure is not only about construction. It is about movement, reliability, trade, safety, regional integration and confidence. Every port upgrade, road project, grid improvement and rail corridor reform strengthens the wider economy.

Metsimaholo Local Municipality

About Us

Metsimaholo Local Municipality, like all other municipalities in South Africa, has to use Integrated Development Planning as a method to plan future development in its areas. Integrated Development Planning is an approach to local government planning that was developed with an objective to ensure developmental municipalities and also to overcome the poor planning arrangements of the past.

Our Vision

'An innovative and excellent Municipality that facilitate sustainable development through quality service delivery and inclusive economic growth'

Our Mission

'Performing Municipality that strives for Economic development and Sustainable service delivery through sound, professional, cooperative governance and public participation principles'

Our Values

- Accountability
- Service Excellence
- Integrity
- Partnership

INVESTMENT ZONES & SEZs

**SPECIAL
ECONOMIC
ZONES**

BUILDING INDUSTRY. DRIVING EXPORTS. GROWING SOUTH AFRICA.

Creating Hubs for Investment and Growth

South Africa's Special Economic Zones (SEZs) are helping to attract investment, stimulate industrial development and create employment by offering businesses strategically located, investment-friendly environments.

Supported by government, SEZs combine modern infrastructure, streamlined regulations and targeted incentives to encourage local and international investment in priority industries.

Why SEZs Matter

Located near major ports, airports, transport corridors and industrial centres, SEZs are designed to strengthen South Africa's competitiveness while supporting exports and regional development.

Their primary objectives include:

- Attracting domestic and foreign investment
- Expanding manufacturing capacity
- Encouraging exports
- Supporting industrialisation
- Creating sustainable employment
- Developing regional economies

By concentrating investment in strategic locations, SEZs help accelerate economic growth while improving access to infrastructure and logistics.

Strategic Investment Locations

South Africa's network of Special Economic Zones supports a diverse range of industries across the country.

Well-known SEZs include:

- Coega SEZ (Eastern Cape) – Manufacturing, logistics, energy and industrial development.
- Dube TradePort SEZ (KwaZulu-Natal) – Air freight, logistics, agriculture and pharmaceuticals.
- OR Tambo SEZ (Gauteng) – High-value manufacturing, jewellery and advanced exports.
- Musina-Makhado SEZ (Limpopo) – Energy, metallurgy and industrial development.
- Saldanha Bay SEZ (Western Cape) – Maritime services, oil, gas and marine engineering.

Each zone has been developed around regional strengths, creating specialised investment opportunities for different sectors.

Benefits for Investors

Businesses operating within SEZs may benefit from a range of government support measures, including:

- World-class industrial infrastructure
- Strategic transport connections
- Investment facilitation services
- Reduced administrative processes
- Sector-specific incentives
- Access to export markets
- Opportunities for public-private collaboration

These advantages help reduce operating costs while improving access to domestic and international markets.

Key Takeaways

- SEZs are designed to attract investment and accelerate industrial growth.
- Strategic locations improve access to transport and export markets.
- Government incentives support business expansion.
- SEZs create opportunities for suppliers, contractors and SMMEs.
- Investment zones contribute to long-term regional economic development.

Did You Know?

South Africa currently has multiple operational and developing Special Economic Zones, each specialising in industries aligned with regional strengths such as manufacturing, logistics, renewable energy, aviation and maritime services.

Supporting Inclusive Growth

Beyond attracting major investors, SEZs create opportunities for local suppliers, contractors and SMMEs. Construction, maintenance, logistics, professional services and manufacturing all benefit from the broader economic activity generated within these investment zones.

As new industries establish themselves, surrounding communities gain through employment, skills development and increased business opportunities.

What This Means

For businesses: SEZs provide access to modern infrastructure, investment incentives and growing industrial ecosystems, making them attractive locations for expansion and long-term investment.

For communities: Investment zones stimulate local economies by creating jobs, developing skills and encouraging the growth of supporting businesses and services.

EXPORT OPPORTUNITIES

EXPANDING MARKETS.
CREATING GROWTH.

South African businesses are increasingly well positioned to compete in global markets. Through trade agreements, export incentives and support programmes, government is helping local exporters access new customers, increase competitiveness and grow sustainable international trade.

KEY ENABLERS

Market access through
international agreements

Export and incentives
for businesses

Trade promotion and
market intelligence

Quality standards and
competitiveness support

Digital tools and export
readiness programmes

GROW YOUR GLOBAL FOOTPRINT

- Identify the right markets for your products or services.
- Improve quality, packaging and compliance with international standards.
- Leverage trade agreements to reduce tariffs and barriers.
- Access export finance and risk cover options.
- Build partnerships and distribution networks abroad.

Global markets offer limitless potential for growth, innovation and shared prosperity.

[Back to Table of Contents](#) [CLICK HERE!](#)

PROMISING EXPORT SECTORS

AGRICULTURE & AGRO-PROCESSING

Fruits, nuts, wine, grains, sugar and processed food products.

MINERALS & METALS

Platinum group metals, gold, manganese, chrome and other critical minerals.

MANUFACTURING

Automotive components, machinery, chemicals, plastics and industrial

INDUSTRIAL SERVICES

Engineering, construction, ICT solutions and professional services.

CREATIVE INDUSTRIES

Film, music, design, fashion and cultural products.

DID YOU KNOW?

South Africa has trade agreements with more than 70 countries and is a member of the African Continental Free Trade Area (AfCFTA), opening access to a market of over 1.3 billion consumers.

EXPORT SUPPORT AVAILABLE

- Export marketing assistance
- Market research and intelligence
- Export readiness training
- Compliance and standards support
- Trade missions and expos
- Export financing solutions
- Business advisory services

KWAZULU-NATAL LEGISLATURE

Hon. NN Boyce
Speaker

The KwaZulu-Natal Legislature is one of the nine provincial legislatures in South Africa. It is the highest law-making body in KwaZulu-Natal that is constitutionally mandated to pass provincial laws, exercise oversight over the provincial government and facilitate public involvement in its processes of law-making and oversight.

The KwaZulu-Natal Legislature consists of 80 Members, elected every five years on a party list proportional representation system. The Legislature is led by the Speaker and Deputy Speaker who preside over the sittings of the Legislature. The Premier and Members of the Executive Council (MECs) are appointed from the 80 Members of the Legislature and are accountable to the Legislature for their activities in the provincial government.

The 6th Term of the KZN Legislature which started in 2019 and ends in 2024, is made up of the following political parties who are represented as follows:

- African National Congress (ANC) – (44)
- Inkatha Freedom Party (IFP) – (13)
- Democratic Alliance (DA) – (11)
- Economic Freedom Fighters (EFF) – (8)
- African Christian Democratic Party (ACDP) – (1)
- African Transformation Movement (ATM) – (1)
- National Freedom Party (NFP) – (1)
- Minority Front (MF) – (1)

In doing its work, the Legislature facilitates public participation to give citizens a voice in the governance of the province. There are many avenues for participation in the work of the Legislature such as the following:

- Public hearings for law-making.
- Submissions to committees.
- Attending Legislature sittings and committee meetings.
- Sector parliaments for various groups.
- Submitting petitions to the Legislature.

The KZN Legislature is based in Pietermaritzburg, the Capital of KwaZulu-Natal Province. It is situated on 239 Langalibalele Street in the City Centre. You can visit the Legislature to attend House sittings and Committee meetings. More information can be obtained from our website www.kznlegislature.gov.za

ROADS, HOUSING, WATER AND ENERGY PROJECTS

BUILDING TODAY. IMPROVING TOMORROW.

South Africa's infrastructure investment pipeline continues to expand, creating jobs, improving services and strengthening communities. These projects are essential to building a more inclusive, sustainable and resilient economy.

ROADS & TRANSPORT

Upgrading national, provincial and local roads, bridges and public transport systems. These projects improve mobility, road safety and access to economic opportunities.

HOUSING & HUMAN SETTLEMENTS

Building sustainable human settlements and affordable housing for all. Integrated developments include social amenities, schools and community facilities.

WATER & SANITATION

Investing in water infrastructure, dam safety, treatment works and sanitation systems to improve quality of life and protect public health.

ENERGY INFRASTRUCTURE

Expanding generation capacity, modernising the grid and supporting renewable energy projects to deliver reliable and affordable power.

KEY PROJECT HIGHLIGHTS

ROAD NETWORK IMPROVEMENT

Major rehabilitation and upgrade projects across national, provincial and municipal roads, including bridge strengthening and community access roads.

AFFORDABLE HOUSING DELIVERY

Large-scale housing developments, rental housing programmes and informal settlement upgrades across multiple provinces,

WATER SECURITY INVESTMENT

New dams, water treatment plants, pipeline refurbishments and wastewater upgrades to enhance water security,

ENERGY EXPANSION

New generation projects, transmission infrastructure and renewable energy developments to support economic growth.

LOCAL ECONOMIC BENEFITS

Projects create jobs, support SMMEs and build skills within communities, ensuring inclusive economic participation

IMPACT THAT MATTERS

- Create jobs and support local economies
- Improve access to essential services
- Strengthen infrastructure resilience
- Promote sustainable development
- Enhance quality of life
- Build socio-economic opportunities

Strong infrastructure is the foundation for inclusive growth, resilient communities and a better future for all South Africans.

ENABLING SUSTAINABLE DEVELOPMENT

STRATEGIC PLANNING

Integrated planning ensures projects are aligned with national priorities and community needs.

PARTNERSHIPS

Collaboration between government, private sector and communities drives innovation and accelerates delivery.

GOOD GOVERNANCE

Transparent procurement, strong oversight and accountability ensure value for money.

INVESTING IN OUR FUTURE

Roads, housing, water and energy projects are more than construction. They are investments in people, productivity and long-term prosperity. Together, we are building a stronger South Africa.

PROJECT TIMELINES AND STAKEHOLDERS

From Planning to Project Delivery

Every successful infrastructure project follows a structured process involving careful planning, collaboration and ongoing oversight. Whether building roads, housing, water infrastructure or energy facilities, projects require coordination between government, industry and local communities to ensure successful delivery.

Understanding how projects progress from concept to completion helps businesses identify opportunities while giving communities greater insight into how public infrastructure is delivered.

The Infrastructure Project Lifecycle

Although every project is unique, most follow a similar development process.

Typical project stages include:

- Strategic planning and feasibility studies
- Budget approval and funding
- Environmental and regulatory approvals
- Design and engineering
- Procurement and tendering
- Construction and implementation
- Quality assurance and commissioning
- Ongoing maintenance and asset management

Each stage contributes to ensuring projects are financially viable, technically sound and capable of delivering long-term public value.

Who Delivers Infrastructure?

Infrastructure projects rely on collaboration between multiple stakeholders, each with clearly defined responsibilities.

Key stakeholders include:

Government

- National departments
- Provincial governments
- Municipalities
- State-owned enterprises

Private Sector

- Contractors
- Consulting engineers
- Architects
- Quantity surveyors
- ICT specialists
- Equipment suppliers

Communities

- Residents
- Community organisations
- Traditional leadership
- Local businesses
- Labour representatives

Working together helps improve project delivery while ensuring infrastructure responds to community needs.

Why Timelines Matter

Effective project management depends on realistic schedules, regular monitoring and strong communication between stakeholders.

Well-managed timelines help to:

- Reduce project delays
- Improve budget control
- Coordinate contractors
- Manage project risks
- Improve quality assurance
- Maintain public confidence

Clear milestones also allow businesses to prepare for procurement opportunities and plan resource requirements.

Building Long-Term Value

Infrastructure projects continue creating value long after construction ends. Roads require maintenance, water systems require monitoring and public facilities require ongoing management to ensure they remain safe, efficient and sustainable.

Successful infrastructure delivery is therefore measured not only by completion dates, but by the lasting benefits projects provide to communities, businesses and future generations.

Key Takeaways

Infrastructure projects follow structured planning and delivery processes. Collaboration between government, industry and communities is essential. Effective project management improves quality and accountability. Long-term maintenance is critical to infrastructure success. Transparent planning builds confidence and encourages investment.

Did You Know?

Large infrastructure projects often involve dozens of organisations, from planners and engineers to environmental specialists, contractors, suppliers and community representatives—all working together throughout the project lifecycle.

RICHTERSVELD MUNICIPALITY

Enhancing municipal service delivery, growth and development

Vision and Mission Statement of Richtersveld Municipality: The strategic intent of Council over the next few years will be to enhance municipal service delivery and growth and development offerings.

Mr. Cornell Knoph
Mayor

+27 27 851 1111 

www.richtersveld.gov.za 

The Richtersveld Local Municipality is in the Namakwa District of the Northern Cape Province. The Richtersveld is a unique landscape surrounded by a variety of contrasts. It is a conservation area.

Rainfall is minimal and water is a scarce commodity, yet the vast plains, which are considered a special place by some, are still a very beautiful region with unique characteristics that attract thousands of tourists.

In Port Nolloth there is the ocean, at Alexander Bay there is the Orange River, and at Lekkersing and Eksteensfontein there is underground water that is a little brackish.

GOVERNMENT-BACKED TOURISM CAMPAIGNS

SHOWCASING SOUTH AFRICA. ATTRACTING THE WORLD.

Tourism is a powerful driver of economic growth, job creation and global investment. Through strategic campaigns and partnerships, government is positioning South Africa as a world-class destination for leisure, business, investment and events.

OUR TOURISM CAMPAIGNS

Government-led campaigns highlight South Africa's diverse attractions, cultural heritage and business opportunities. These campaigns are designed to:

- Increase international arrivals
- Promote domestic travel
- Support investment in tourism infrastructure
- Market South Africa as a safe, welcoming and world-class destination
- Drive year-round tourism and regional growth

KEY NATIONAL CAMPAIGNS

MEET IN SOUTH AFRICA

Showcasing South Africa as a leading business events destination and attracting conferences, exhibitions and incentives.

SOUTH AFRICA AWAITS

Inspiring travellers to explore Our landscapes, cultures, cities and world-famous experiences.

WE DO TOURISM

Encouraging South Africans to travel locally and support businesses and communities across the country.

INVEST IN SOUTH AFRICA

Promoting tourism investment opportunities and partnerships that drive growth and create jobs.

OUR TOURISM CAMPAIGNS

01

ATTRACT MORE VISITORS

Targeted international marketing to grow arrivals from key and emerging markets.

02

PROMOTE REGIONAL TOURISM

Highlight unique regional experiences and support local enterprises and attractions.

03

DRIVE INVESTMENT

Attract investment into tourism infrastructure, hospitality and travel services.

04

ENHANCE THE VISITOR EXPERIENCE

Improve infrastructure, safety, digital services and traveller convenience.

05

BUILD A SUSTAINABLE FUTURE

Promote tourism that protects our environment and empowers communities.

THE IMPACT OF TOURISM

Supports more than 1.5 million jobs.

Contributes billions to the economy each year.

Promotes South Africa as a top destination for travel and events.

Creates opportunities for communities and SMMEs.

PARTNERSHIPS THAT DELIVER

We work with the private sector, provinces, airlines, tourism bodies and communities to deliver impactful campaigns and experiences that put South Africa on the world stage,

TOGETHER, WE GROW TOURISM

Through targeted promotion, strong partnerships and quality experiences, South Africa continues to welcome the world and unlock the full potential of tourism for inclusive and sustainable growth.

HIDDEN GEMS AND REGIONAL HIGHLIGHTS

DISCOVER MORE. EXPERIENCE DEEPER.

Beyond our world-famous destinations, South Africa is rich with diverse regions, authentic experiences and natural beauty waiting to be explored. From breathtaking landscapes and vibrant cultures to emerging towns and unique local attractions these hidden gems offer unforgettable journeys and new opportunities for tourism growth.

WHY EXPLORE BEYOND THE WELL-KNOWN?

- Support local economies and communities
- Encourage sustainable and responsible travel
- Reduce seasonal pressure on major attractions
- Experience authentic culture and hospitality
- Discover new business and investment opportunities

The best memories are often found off the beaten path.

EMERGING OPPORTUNITIES

LOCAL ENTREPRENEURSHIP

Growing guesthouses, craft markets, tours and cultural experiences are creating jobs and showcasing local talent.

SMALL TOWNS, BIG POTENTIAL

Regional towns are enhancing infrastructure, events and attractions to welcome more visitors.

NATURE-BASED EXPERIENCES

Hiking trails, waterfalls, coastal escapes and wildlife experiences offer adventure and relaxation.

CULTURAL HERITAGE

Rich traditions, festivals and heritage routes connect visitors to the heart and soul of our provinces.

REGIONAL SPOTLIGHTS

EASTERN CAPE

Wild Coast adventures, historic sites and warm coastal hospitality.

WESTERN CAPE

Scenic drives, Cape Winelands, coastal towns and nature reserves.

KWAZULU-NATAL

Beaches, battlefields, Zulu heritage and the Drakensberg Mountains.

FREE STATE

Wide open spaces, peaceful towns and rich cultural history.

NORTH WEST

Heritage sites, nature reserves and vibrant local culture.

LIMPOPO

Big 5 experiences, waterfalls, heritage routes and bushveld beauty.

MPUMALANGA

Panorama Route, waterfalls and the gateway to Kruger

NORTHERN CAPE

Stargazing, landscapes and unique desert experiences.

LOCAL STORIES. LASTING IMPACT.

Every region has a story.
Every visit creates impact.
By promoting regional tourism,
we celebrate our diversity and
build a stronger, more inclusive
tourism economy.

LET'S EXPLORE TOGETHER

Whether it's a mountain escape, a cultural journey, a coastal retreat or a small-town adventure, South Africa invites the world to discover its many hidden treasures.

MORE PLACES. MORE EXPERIENCES. MORE SOUTH AFRICA.

South African Tourism is the national tourism agency responsible for marketing South Africa as a destination internationally and domestically.

The Agency's objectives are to: develop and implement marketing strategies efficiently in the specific market segments; promote South Africa's scenic beauty, diverse wildlife, ecotourism, and variety of cultures and heritage; realise South Africa's potential as a big event destination; engender a travel and tourism culture among South Africans; use the more focused, cost-effective and customer-driven approach taken to its international marketing operations in a quest to 'play smarter' in the increasingly competitive global tourism market; continue including initiatives such as ongoing segmentation research into key spend and volume markets abroad, which highlight international growth areas where South African Tourism's marketing efforts will reap the greatest returns; continue with its aggressive e-Business Tourism Growth Strategy, which incorporates fully-fledged research and a website; create market access by participating in major travel shows, coordinate advertising, public relations and direct mailing campaigns, and conduct familiarising trips with media, tour operators and travel agents to enhance understanding of South Africa as a leisure and business events destination; and be active in promoting South Africa as a destination for business tourism through its Business Tourism Unit, which works closely with sector representatives both abroad and in South Africa.

South African Tourism also focuses on encouraging the grading of establishments to enhance South Africa's value proposition and seamless experiences for all tourists.

VISION

Your partner towards a vibrant tourism sector.

MISSION

To provide an integrated tourism development support system towards a vibrant tourism sector in the North West Province.

OVERVIEW

The North West Tourism Board was primarily established to:

- Market the North West Province as a tourism destination locally, provincially, nationally and internationally;
- Provide Tourism Training and Skills Transfer in the sector;
- Facilitate Tourism Investment Promotion in the Province;
- Create an enabling environment for Access to Markets for new entrants in the tourism sector in the Province; and
- Contribute to the establishment of enabling environment for job creation in the Tourism Sector in the Province.

INDUSTRY TRENDS LINKED TO GOVERNMENT POLICY

POLICY TODAY. GROWTH TOMORROW.

South Africa's government policies are shaping the future of key industries and creating opportunities for businesses, investors and communities. By aligning with national priorities, industries are innovating, creating jobs and building a more resilient economy.

POLICY DRIVERS OF INDUSTRY GROWTH

ECONOMIC GROWTH & JOB CREATION

Polities that encourage investment, support SMEs and drive industrialisation are creating sustainable jobs and expanding economic participation.

INFRASTRUCTURE INVESTMENT

Government investment in transport, energy, water and digital infrastructure enables industries to grow and compete globally.

ENERGY TRANSITION & SUSTAINABILITY

Policies promoting renewable energy, energy efficiency and environmental responsibility are driving a cleaner, greener economy.

DIGITAL TRANSFORMATION & INNOVATION

Support for digital skills, emerging technologies and innovation ecosystems is positioning South African businesses for the future.

TRADE & INVESTMENT FACILITATION

Trade agreements, export support and investment incentives are opening new markets and attracting foreign direct investment.

SOCIAL INCLUSION & TRANSFORMATION

Polities promoting skills development, B-BBEE and inclusive growth ensure that more South Africans benefit from economic opportunities.

INDUSTRY TRENDS SHAPED BY POLICY

INDUSTRY	POLICY IMPACT	EMERGING TRENDS
MANUFACTURING	Industrialisation strategies, localisation incentives and export support strengthen local production and global competitiveness.	Advanced manufacturing, green industrialisation, circular economy and local value chains.
AGRICULTURE & AGRO-PROCESSING	Land reform, food security initiatives and agri-export support improve productivity and market access.	Smart farming, AgriTechi value-addition and sustainable food systems.
TOURISM & HOSPITALITY	Destination marketing, visa reforms and infrastructure investment boost arrivals and spend.	Experiential travel, domestic tourism growth, digital booking platforms and sustainable tourism.
ENERGY & RESOURCES	Energy policy reforms and investment in renewables support a reliable, diverse and sustainable energy mix.	Renewable energy, hydrogen economy, energy storage and just transition opportunities.
ICT & DIGITAL SERVICES	Broadband expansion, digital skills and innovation incentives accelerate digital inclusion and e-commerce-	AI cloud services, cybersecurity, fintech innovation and digital platform economies.
CONSTRUCTION & REAL ESTATE	Infrastructure programmes, housing policy and public-private partnerships expand development and job opportunities.	Smart cities, affordable housing, green buildings and infrastructure modernisation.

HOW BUSINESSES CAN WORK WITH GOVERNMENT

**STRONGER TOGETHER.
BETTER FOR BUSINESS. BETTER FOR SOUTH AFRICA.**

Collaboration between business and government drives innovation, growth and shared prosperity. By working together, we can unlock opportunities, solve challenges and build a resilient, inclusive and competitive economy.

WAYS BUSINESSES CAN CHANGE

PARTICIPATE

Contribute to policy consultations, public forums and advisory committees.

PARTNER

Work with government on projects that create value and address societal needs.

INVEST

Invest in priority sectors and regions to spur growth and create jobs.

INNOVATE

Bring ideas, technology and solutions that improve services and drive efficiency.

DEVELOP COMMUNITIES

Support local development, skills training and enterprise development.

WHERE BUSINESSES CAN MAKE AN IMPACT

INFRASTRUCTURE DEVELOPMENT

Partner on projects that improve transport, energy, water and digital connectivity.

SKILLS & EMPLOYMENT

Support skills development and job creation initiatives that build a capable workforce.

SMALL BUSINESS GROWTH

Mentor, support and supply SMEs to strengthen local value chains.

SUSTAINABLE GROWTH

Adopt responsible business practices that protect the environment and support inclusive growth.

INCLUSIVE INNOVATION

Collaborate on innovation that solves real challenges and improves lives.

THE BENEFITS OF PARTNERSHIP

STRONGER ECONOMY

Drives investment, productivity and economic growth.

SOCIAL IMPACT

Improves services, creates jobs and uplifts communities.

SHARED RISK, SHARED VALUE

Combines resources and expertise to achieve better outcomes.

EFFICIENCY & INNOVATION

Brings new ideas and technology to improve how we work.

STRONGER TRUST

Builds confidence through transparency, accountability and collaboration.

COMPETITIVE ADVANTAGE

Positions South Africa as an attractive place to do business and invest.

KEYS TO SUCCESSFUL COLLABORATION

OPEN COMMUNICATION

Keep the dialogue and ongoing.

SHARED GOALS

Align on clear, common objectives.

RESPECT & TRANSPARENCY

Build trust through honesty and accountability.

MEASURE & ADAPT

Track progress and continuously improve.

DELIVER IMPACT

Focus on results that create lasting value for all.

E-GOVERNMENT SYSTEMS >>

DIGITAL GOVERNMENT. BETTER SERVICES. STRONGER SOUTH AFRICA.

E-government systems use technology to deliver smarter, faster and more accessible public services. These platforms improve service delivery, increase transparency and empower citizens and businesses to interact With government anytime, anywhere.

BENEFITS OF E-GOVERNMENT

GREATER CONVENIENCE

Access services online,
anytime, anywhere.

COST & TIME SAVING

Reduces paperwork,
travel and waiting times.

COST & TIME SAVING

Access services online,
anytime, anywhere.

INCLUSIVE ACCESS

Expands access to services
for all communities.

EFFICIENCY & PRODUCTIVITY

Streamlines processes and
improves government
performance.

DATA-DRIVEN DECISIONS

Better data leads to
smarter policies and
planning.

HOME AFFAIRS ONLINE

Apply for IDs, passports, birth, marriage and death certificates online.

eFILING (SARS)

Taxpayers can register, submit returns, make payments and track refunds online.

ESKOM SE PUSH

Manage electricity accounts, track usage, report faults and make payments.

eNATIS

National traffic information system for licence renewals, registrations and payments.

VULEKAHLE & MUNICIPAL PORTALS

Access municipal services, pay bills, report issues and track service requests online.

NSFAS ONLINE

Apply for funding, track applications and manage student funding.

EVDS (ELECTRONIC VACCINE DATA SYSTEM)

Supports immunisation planning, vaccine stock management and reporting.

THE IMPACT

Improved access to services for citizens and businesses.

Increased efficiency and reduced operational costs.

Better transparency and public trust.

Empowered communities through digital inclusion.

Smarter government, stronger economy.

BUILDING A DIGITAL FUTURE

By investing in secure, user-friendly and integrated e-government systems, South Africa is building a modern, responsive and people-centred government.

**SMARTER SYSTEMS. BETTER SERVICES.
STRONGER TOGETHER.**

DIGITAL TRANSFORMATION

DIGITAL GOVERNMENT. BETTER SERVICES. STRONGER SOUTH AFRICA.

E-government systems use technology to deliver smarter, faster and more accessible public services. These platforms improve service delivery, increase transparency and empower citizens and businesses to interact With government anytime, anywhere.

THE PILLARS OF DIGITAL TRANSFORMATION

PEOPLE AT THE CENTRE

Designing services around the needs of citizens and businesses for a seamless experience.

PROCESS INNOVATION

Reimagining and simplifying processes to improve efficiency, reduce red tape and save time.

DIGITAL ENABLERS

Leveraging secure, reliable and scalable technology to power better services.

DATA FOR IMPACT

Using data and insights to make smarter decisions and deliver better outcomes.

KEY FOCUS AREAS

DIGITAL SERVICES

Expanding online services that are easy to access, anytime, anywhere.

CONNECTED GOVERNMENT

Integrating systems across departments to improve collaboration and service delivery.

CYBERSECURITY & TRUST

Protecting information and systems to build trust and ensure privacy.

DIGITAL SKILLS & CULTURE

Empowering public servants with the skills and mindset to drive innovation.

INNOVATION & EMERGING TECHNOLOGIES

Exploring new technologies to solve complex challenges and unlock new opportunities.

OUR GOALS

Better Services

Deliver convenient, reliable and inclusive services for all.

Greater Efficiency

Streamline operations and make the best use of resources.

Increased Transparency

Promote openness, accountability and public trust.

Inclusive Growth

Use digital tools to create opportunities and empower every community.

A Future-Ready Government

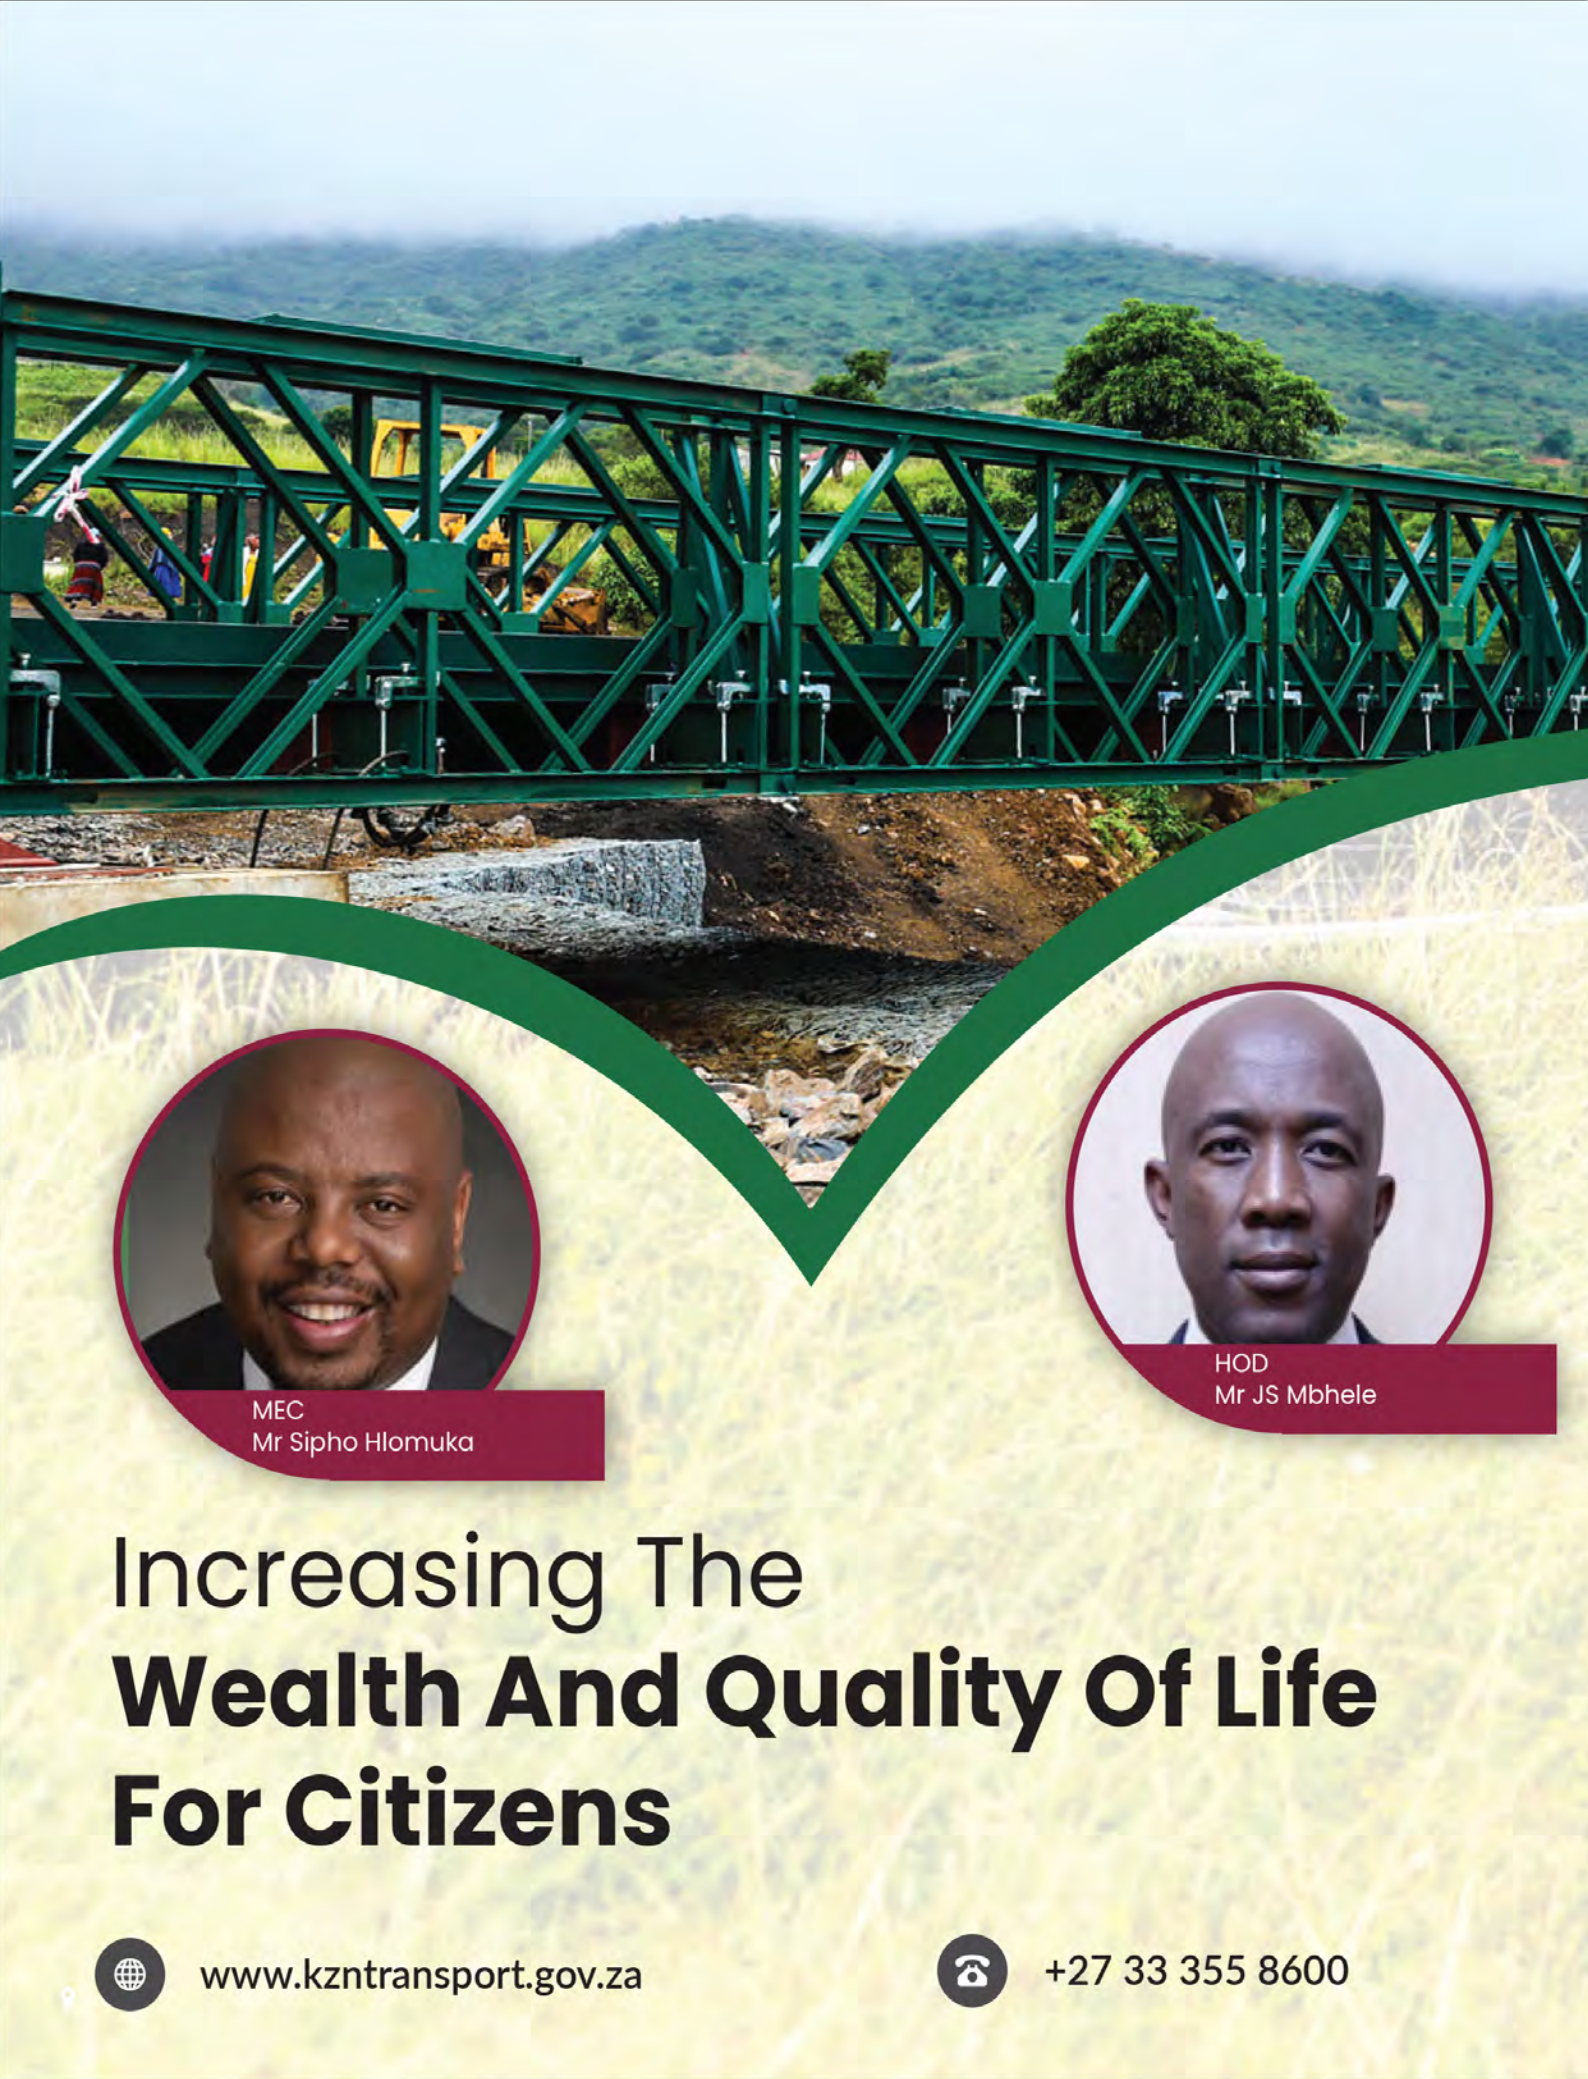

Build an agile government that adapts and innovates for the future.

BUILDING A DIGITAL SOUTH AFRICA

Together, we are building a smarter government that works for people, supports businesses and drives a stronger, more inclusive South Africa.

DIGITAL TODAY. BETTER TOMORROW. STRONGER TOGETHER.

transport

Department:
Transport
Province of KwaZulu-Natal

Strategic Vision

The Department's vision is: "Prosperity through a smart transportation system"
This means that as a Department we connect the Province, the country, Africa and the World, through a globally competitive and sustainable transportation system that drives socioeconomic growth and improves the quality of life of our people.

Mission Statement

The Department's mission is: To facilitate the mobility of people and goods by optimising the usage of all modes of transport through an efficient, reliable, integrated, safe, universally accessible and environmentally friendly transportation system.

Core Functions

Turning the vision of the Department into reality can only be achieved by focusing the attention and energy of all employees and relevant stakeholders on the performance of its core functions, namely: Construct, maintain and repair the provincial road network

Mkhambathini Local Municipality

uMkhandlu Wabantu

Vision

"By 2030 Mkhambathini Municipality will be the KwaZulu Natal's mega-hub for industries, tourism and agriculture along the N3 Corridor which provides for a socially cohesive environment."

Mission

Mkhambathini Municipality commits itself to the following:

- Upholding our leadership vision
- Working with integrity in an accountable manner towards the upliftment of the community.
- Protecting and enhancing the interest of our clients always.
- Consistently performing our function with transparency honesty and dedication in dealing with clients.
- Responding promptly to the needs of our clients.
- Subscribing to the Batho Pele principles.

WE ARE TAKING GENDER-BASED VIOLENCE SERIOUSLY

This women empowerment initiative strives to skill 100 female CPUT students and staff in SAP by August 2020, said CERPiA manager Jerry Ansen at the initiative's launch recently. "The women will learn how the fundamental integrated business processes of procurement, production, planning, project management, sales, customer service, asset management, financial accounting, human resources and analytics interact on SAP ERP [Enterprise Resource Planning]."

POSTGRADUATE PROGRAMMES

IN THE
SCHOOL OF ECONOMIC AND MANAGEMENT SCIENCES

POSTGRADUATE DIPLOMA IN PUBLIC MANAGEMENT

This postgraduate qualification is directed at enabling individuals to apply relevant skills, knowledge and principles to execute management functions required in the public and non-governmental sectors. It seeks to develop individuals who can competently and ethically add public value and function within public domain organisations.

ADMISSION REQUIREMENTS

- A cognate Bachelor's Degree
- A cognate Advanced Diploma plus a minimum of two years' relevant work experience

Applicants who do not meet the minimum admission requirements of the Postgraduate Diplomas but who can demonstrate to the satisfaction of the University that they have a qualification or experiential or work-based learning, which has taken the learner to an equivalent entry level specified above, may be considered for admission and for the recognition of prior learning. The formal Sol Plaatje University Recognition of Prior Learning Policy (SPU RPL Policy) applies. The Head of School may use his/her discretion if the above criteria are not met.

POSTGRADUATE DIPLOMA IN ENTREPRENEURSHIP

This qualification provides a balanced approach to entrepreneurship by blending practical and theoretical exposure for enrolled participants. It will prove invaluable for current entrepreneurs aspiring to grow their business ventures, aspiring entrepreneurs and specialists involved in the public and private entrepreneurship support environment.

ADMISSION REQUIREMENTS

- A cognate Bachelor's Degree (NQF 7)
- A cognate Advanced Diploma (NQF 7)

Future Perfect Skills Development

The Fibre Processing and Manufacturing SETA

was established by the Honourable Minister of Higher Education and Training on 1 April 2011 after government took a decision to cluster sectors in order to strengthen value-chain linkages between related industries.

The FP&M SETA consist of 13 sub-sectors namely the clothing, footwear, forestry, furniture, general goods, leather, packaging, printing, print media, publishing, pulp & paper, textiles and wood products sectors. Although classified individually, the sub-sectors are closely integrated. Together they create tremendous value in the lives of consumers by converting lumber, pulp, natural or synthetic fibres, animal skins/hides into finished products such as furniture, clothing, shoes, protective equipment, paper and paper board, printing (books, magazines etc), industrial fabrics and extending into high-tech applications in many different industries (automotive, health, and building construction to name a few). If you think about it, you can't go through a day without using one or two of the products manufactured in the fibre processing and manufacturing sector.

Dr Felleng Yende,
CEO, FP&M SETA

Our Vision

To be an innovative skills development partner supporting high quality learning and development interventions towards global competitiveness, an inclusive economy and decent work.

Our Mission

To evolve as an agile and ethical institution that facilitates an efficient and effective skills development process contributing to the achievement of sector competitiveness, transformation and economic growth.
