

Future Perfect Skills Development

The Fibre Processing and Manufacturing SETA

was established by the Honourable Minister of Higher Education and Training on 1 April 2011 after government took a decision to cluster sectors in order to strengthen value-chain linkages between related industries.

The FP&M SETA consist of 13 sub-sectors namely the clothing, footwear, forestry, furniture, general goods, leather, packaging, printing, print media, publishing, pulp & paper, textiles and wood products sectors. Although classified individually, the sub-sectors are closely integrated. Together they create tremendous value in the lives of consumers by converting lumber, pulp, natural or synthetic fibres, animal skins/hides into finished products such as furniture, clothing, shoes, protective equipment, paper and paper board, printing (books, magazines etc), industrial fabrics and extending into high-tech applications in many different industries (automotive, health, and building construction to name a few). If you think about it, you can't go through a day without using one or two of the products manufactured in the fibre processing and manufacturing sector.

Dr Felleng Yende,
CEO, FP&M SETA

Our Vision

To be an innovative skills development partner supporting high quality learning and development interventions towards global competitiveness, an inclusive economy and decent work.

Our Mission

To evolve as an agile and ethical institution that facilitates an efficient and effective skills development process contributing to the achievement of sector competitiveness, transformation and economic growth.
